Dr Tzu-yang Wang is a Clinical & Laboratory Haematologist at Haematology Queensland (HQ). He is also appointed as

- Staff Specialist - Princess Alexandra Hospital
- Pathologist – QML pathology
- Senior Lecturer – University of Queensland

Haematology Queensland is independently owned by a group of Haematologists who offer a personalised approach to the complex needs of patients without the constraints of "big corporates".

In addition to providing the best possible standard of care to patients. He is also a current investigator in over 15 clinical trials across a broad range of haematological disorders, allowing patients access to cutting edge treatment that may not otherwise be possible.

Tzu-yang received his Bachelor of Medicine and Bachelor of Surgery with Honours at the University of Queensland in 2008 and completed specialist training at the Haematology and Bone Marrow Transplant Unit, Royal Brisbane and Women's Hospital and Princess Alexandra Hospital. He has also worked as a Staff Specialist at these institutions. He is a fellow of the Royal Australian College of Physicians and The Royal College of Pathologist of Australasia.

He has special interests in the diagnosis and management in both malignant and non-malignant haematological problems, including:

- **Leukaemia**
- **Lymphoma**
- **Myeloma**
- **Myelodysplasias**
- **Myeloproliferative disorder**
- **Bone Marrow Transplant**
- **Haemostasis and thrombosis**

Tzu-yang is a contributor to eviQ – Australian consensus guideline in cancer management as well as a member of the Australian Leukaemia and Lymphoma group. He has published numerous posters at Haematology Society in transplant, malignant and non-malignant haematology. He is also a Senior Lecturer of The University of Queensland and regularly teaches physician trainees as well as junior medical staff in preparation for their specialty exam.

Languages Spoken: fluent English and Mandarin (中文).
